- Excellent performance & communication in **work groups**.

EDUCATION

Soy Dalto (Youtube Channel)
2019-2021

There were a total of 4 courses that completed **HTML, CSS, JavaScript and Python (2023)**, with a duration of approximately 10 hrs, each of them done with their respective projects and notes. (I consider them to be my strongest skills)

PROJECTS:
- Website for entrepreneurship.
- Simple projects (Forms, calculators, requests with **async and await** and data transfer with **JSON** structure).

FreeCodeCamp
2022 Jan-Mar

I took a course with a total load of 8 hours of **React.js**, I've learned how to create functional and class components, use some type of hooks and create default react applications. Thanks to that I was able to complete a personal project.

Alura // UFG (Universidad Francisco Gavidia)
2022- Actualidad

*Alura is an E-school of Brazil that granted me a scholarship in their courses, I've finished one of **Git and GitHub**, I have the original diploma and I am currently learning **the Java language**, **Object Oriented, using Polymorphism with inheritance. and interfaces**, I've finished 4/5 courses and I have all the diplomas and an in progress project.*
